AIRVAK AIRVAK BLOWERS PVT. LTD.

Works: Plot No.-14/13 Nangli Sakrawati Industrial Area, M.S. Park, New Delhi- 110043 (INDIA) Telefax: 011-65171800 Mobile: 9312168073, 9971912499 URL: www.airvakblowers.com. E-mail: info@airvakblowers.com. CIN: U29268DL2013PTC25307

BRANCH OFFICE: DELHI - PUNE - CHENNAI

"AIRVAK" Leaders in Blower & Vacuum Technology

- Twin Lobe Air Blower
- Twin Lobe Water Cooled Blower
- Twin Lobe Gas Blower
- Twin Lobe Vacuum Blower
- Twin Lobe Aquaculture Blower
- Acoustics Enclosure
- Mechanical Vacuum Booster
- Package Blower Systems

ENGINEERING | EVALUATION | DESIGNING | MANUFACTURING | TESTING | EXECUTION | POST SALES & SERVICE

"AIRVAK BLOWERS PVT. LTD."

QUALITY POLICY

We at Airvak are committed to continually improve in all process areas leading to quality product by involving competent and motivated employees at all levels leading to overall growth of the company through satisfied customers.

QUALITY OBJECTIVES

- Delivery on time, delivery in full, of defect free products.
- Wastage reduction
- Introducing New / upgraded products better than the competitor, meeting customer's expectations.
- Cost reduction by Value Engineering / other methods
- Timely and effective customer support & services.
- Achieving and sustaining superior levels of performance in all operations.
- Up gradation of Infrastructure.
- Human resources development

CORE VALUES

- Customer Focus
- Respect for Individuals
- Strong Relationships
- · Passion & Drive
- Institution Building
- Working Together

MANUFACTURING FACILITIES

AIRVAK MECHANICAL VACUUM BOOSTERS

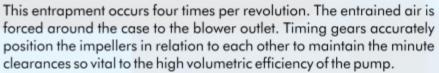

AIRVAK Mechanical Vacuum Booster Pumps, import substitutes, are used in growing number of applications where fast pump down times are required, and environment or energy usage concerns, rule out any alternative pump selection. Everest Booster Pumps enhance the performance, ultimate vacuum and pumping speed of oil-sealed/waterring/dry vacuum type of mechanical pumps, which are widely used in the industry

OPERATING PRINCIPLE

AIRVAK Vacuum Boosters are positive displacement pumps with two figure eight shaped impellers rotating in opposite directions inside the casing. As each lobe of an impeller passes the blower inlet, it traps a quantity of air equal to exactly one fourth the displacement of the blower.

YFFATURES

- Boosts vacuum levels of backing pumps, thereby reducing process temperature
- Boosts volumetric displacement, Thereby reducing Process time.

Model	Capacity (M3/Hr)	Maximum Differential Pressure (Mbar)	Rec. Motor HP/1440 RPM	Rec. Line Size
AVB1	260	90	1.5 HP	65
AVB5	400	120	ЗНР	65
AVB15	800	90	5HP	80
AVB30	1650	70	7.5HP	125
AVB50	2950	50	10HP	125
AVB60	3900	65	15HP	200
AVB70	5250	45	15HP	200

Application:

Evaporative Concentration, Vacuum Distillation, Polymerization, Crystallization, Vacuum Impregnation, Vacuum Drying, Sterlization, Vacuum Cooling, Object Metallising, Roll Metallisation, Semi-conductor Processing, Manufacture of Vacuum & Microwave Tubes, Manufacture of GLS Automotive & Miniature Lamps, Tube Light Production, Sintering, Brazing, Electron Beam Welding, Heat Treatment, Ionic Nitriding, Tool Coating, Vacuum Casting, Degassing & Refining, Plasma Welding, Evaporation, Sputtering, Space Research and Development

AIRVAK Boosters Advantages High vacuum of the order of 0.001 Torr or better High pumping speeds at low pressures, capacity is boosted by 8 to 10 times or more Relatively low power consumption for such performance boosting Considerable reduction in pump down time of vacuum machine Prevents Oil back streaming from Rotary pumps Dry Pumping suitable for Gas/Vapour Loads

AIRVAK Boosters Features Entirely mechanical, light weight and compact design High operating speeds because of dynamically balanced rotors and helical ground gears for long life and quiet operation Can be mounted separately from the backing pump or directly on the inlet of the backing pump ISO Flanges Unique impeller design for high volumetric efficiency Compatible with all vacuum systems Efficient air-cooled design

AIRVAK SOUND PROOF ACOUSTIC ENCLOSURES

NOISE INSULATION ENCLOSURES: AIRVAK acoustic enclosures are one of the most effective means for containment of excessive noise and for then insulation of the workers from the noise. Even where the silencers are used, they can only treat the air borne noise. The treatment of mechanical noise from the blower, motor etc. is beyond the scope of silencers. Thus, in order to achieve low noise levels, that are often statutory requirements, Noise enclosures/Acoustic Hoods are required.

AIRVAK acoustic design is so Flexible with multi door for smooth operation of the equipment. AIRVAK has developed four door acoustic with proper louvers along with inbuilt exhaust fan for proper heat transmission.

MANY SPECIAL FEATURES OF AIRVAK ACOUSTIC ENCLOUSRE.

- Easy To Operate
- Single Or Double Glazed Windows
- Louvers To Minimize Water Entry And Maximize Air Flow Through The Enclousre
- Rubber Mounted Vibration Isolation.
- Proper Ventilation & Cooling
- Hinged Or Lift Doors With Single Or Double Seals.

NOISE CONTROL

- Noise can be effectively controlled within the acceptable levels by:
- Noise Control at Design Stage
- Noise Control at Source
- Control of Noise Transmission Path
- Protective Measures at the Receiver

Design The sound reduction enclosures are specially designed to reduce noise pollution to suit the local environment. These are engineered to take care of air intake and outlet, resulting in a pleasing and attractive design.

Construction The robust bodywork of sound reduction enclosures is due to its construction from preformed heavy gauge sheet steel section and its reinforcement with fabricated superstructure. Rubber gaskets are provided to all doors and external joints to resist weathering. The bolted structure provides easy removal of panels for maintenance of servicing of Blowers.

Air Circulation Sufficient cooling air inlet acoustic louvers are provided in the enclosure for efficient air circulation avoiding derating of the machine.

Installation The sound reduction enclosures are preassembled on a support frame and can be easily and quickly assembled at site.

AIRVAK BLOWERS PVT LTD

Manufacturing of Twin Lobe Rotary Air Blowers, Water cooled Blowers, Gas Blowers, Vacuum Blowers, Vacuum Boosters and acoustic enclosures. The company has consistently strengthened its manufacturing base, producing a wide range of products. These wide-ranging products and the technical

expertise gained over the years have enabled AIRVAK to serve various segments of industry such as water treatment plants, effluent treatment plants, cement plants, aquaculture Plant, chemical & pharmaceutical plants, food processing units, waste oil re-refining units, paper plants, vacuum plants and systems and pneumatic conveying systems.

The blowers find use in applications requiring medium pressure air such as aeration in sewage treatment and effluent treatment plants, filter backwash, agitation of electrolyte, pneumatic conveying, regeneration of dryers & molecular sieves, maintaining BOD of water etc.

The mechanical vacuum booster developed by the company, finds use in chemical and pharmaceutical processes, bulb and tube light production, waste oil re-refining, roll and object metallizing, vegetable oil deodorization, solvent recovery, vacuum drying, tray drying, vacuum distillation, thin film deposition, molecular distillation, vacuum furnace, transformer oil dehumidification, chemical laser, evaporative cooling etc.

We are concentrating more on application engineering and in helping our customer's save on their processes. This innovation has not only compensated on our general sales but even helped us to outperform on our targets. Our application oriented R&D has made it possible to cover wider areas of application, offering cost effective and energy efficient solutions thus creating larger market demand for our product.

A focus on innovative design and high quality machined parts has earned AIRVAK a reputation for excellent workmanship amongst its users.

AIRVAK has offered its customers quality, cost-effective machines necessary to meet the changing technology. Our commitment to total quality in both our products and services is the foundation upon which our future business is based.

Design & manufacture of mechanical vacuum boosters for replacement of steam jet ejectors.

We know that performance of the OEM's design ultimately depends on the quality and dependability of its components. That's why so many manufacturers of Water Treatment Plants, Effluent Treatment Plants, Cement Plants, Aquaculture Farms, Chemical Plants, Paper Plants, Vacuum Plants and Systems, and Pneumatic Conveying Systems have entrusted their reputation to Airvak. Our broad product line of Roots Blowers/Compressors (Bi-lobe & Tri-lobe) (Air/Gas Duty), Mechanical Vacuum Boosters & Acoustic Hoods consists of standard and custom models that fall into major product group.

The hallmark of our commitment to quality is our International Standards Organization (ISO) registration. This ensures that our OEM customers receive products of highest quality.

AIRVAK is Manufacturing all Parts on Imported CNC Machines which Gives High quality with close Tolerances to make a super quality Machines. We have Automatic Digital Dynamical Balancing Machines for Balancing of Rotors to Make Long life of Bearings.

"AIRVAK BLOWERS PVT. LTD."

AIRVAK TWIN LOBE COMPRESSORS/ROOTS BLOWERS

A complete range of Standard Blowers is available for flow rates from 10 m3/hr to 10,000 m3/hr in single stage and upto any capacity in parallel configurations, for working pressures upto 1 kg/cm2. They are available as total package units, ready to install or as bare blower units for replacement.

AIR COOLED BLOWERS: Air Cooled blowers are suitable from pressure of 0.1kg/cm2 to 0.7kg/cm2.AIRVAK Blowers have a unique design where the Oil chambers is physically isolated with main chamber with air gap Between hence it is more effective in air cooled construction for high pressure also. These are available in different orientation flow and with Different MOC to suit customers specific requirements.

WATER COOLED BLOWERS: Water Cooled blowers are suitable from pressure of 0.6kg/cm2 to 1 kg/cm2. These are similar to air cooled type in construction and performance except in the change of cooling arrangement. In water cooled blowers end plates have water jackets around them, where water is circulated, which dissipates the heat of compression generated and keeps the internals cool. AIRVAK Blowers have a unique design of single inlet and single outlet for cooling water and require no cumbersome water pipe connections externally. Internal circulation of water to various areas is through inbuilt channels. This unique design makes the operations very simple, yet very effective. The cooling water inlet is at the bottom so that the water rises up against gravity, reaching all the corners before it comes out from the outlet. The flow rates of cooling water are low.

GAS BLOWERS: Gas blowers are used for boosting of Bio Gas, Nitrogen, Flue gas, Co2 gas and many more. These blowers are suitable for pressure from 0.1kg/cm2 to 1 kg/cm2. BIOGAS BLOWERS generally used in Biogas lines to boost the gas pressures to meet the burner input demand. These are generally vertical in construction, that is suction top and discharge bottom, so as to prevent any accumulation of corrosive matter inside the casing. Since they operate in closed loop, suction and discharge silencers are generally not required. Special material of construction, lubrication and sealing arrangements make them ideal choice for Biogas applications.

VACUUM BLOWERS: Vacuum blowers are used for negative pressure up to 0.5kg/cm2.

AQUA BLOWERS: These blowers are mainly used in hatcheries, aquaculture and electroplating. This blowers are available absolutely Oil Free in Air Cooled construction.

ACOUSTIC ENCLOSURES: AIRVAK Acoustic enclosure are used for reduction of sound

VACUUM BOOSTER: Used for High Vacuum Applications.
STANDARD DESIGN AND CONSTRUCTION FEATURES

100% oil free air delivery.

Factory engineered, factory guaranteed, superior product.

Alloy steel hardened and ground timing gears.

Anti-friction bearings.

Rotary oil sealings.

Rigid one piece CI casing and side plates.

Horizontal and vertical configurations available.

Easy rotor timing setting.

No vanes, valves or rings to wear.

Large inlet and outlet connections for minimum loss.

Improved volumetric efficiency and reduced operating temperatures.

Alloy steel toughened shafts ground to close tolerances.

APPLICATIONS

Water Treatment Plants For backwashing of filter/mixed beds.

Effluent/sewage Treatment Plants For diffused aeration and agitation of effluent/sewage.

Cement Plants For Blending, Aeration, Fluidization, Conveying.

Aquaculture For maintaining the dissolved Oxygen level.

Chemical Plants For supplying of process air.

Electroplating Plants For Oil Free air agitation of electrolyte.

Paper Plants Knife edge coating, Drying, Conveying, Vacuum pickup.

Yarn Drying Vacuum/Pressure Drying of Yarn.

Vacuum Moulding For creating quick vacuum.

Polyster Chip Conveying & drying For transfer of polyster Chips and other similar materials.

Bag Filters For reverse cleaning of Filter bags.

Pneumatic Conveying Vacuum, Pressure and Combination Conveying of cereals, cement, husk, baggase, granules, powders and other similar material.

Regeneration of Dryers & Molecular Sieves.

AIRVAK TWIN LOBE ROTARY AQUACULTURE BLOWERS

AIRVAK has introduced its new range of AQUA Series Twin Lobe Rotary Air Blowers (Roots Blowers) to meet the electroplating & aqua culture requirements which essentially demand 100% Oil Free Air. These blowers are totally dry machines where lubricating chambers are physically isolated from the main gas chamber ensuring 100 % Oil Free Air delivery. These blowers have a major advantage over centrifugal and regenerative blowers as they are more power efficient, can handle high flow rates and are insensitive to water depth variations. They deliver, practically, a constant flow rate irrespective of back pressures thereby maintaining dissolved oxygen levels. These machines are very versatile and can be run by electric motors or genset & Diesel engines. They have low maintenance and no internal adjustments resulting in prolonged trouble free operation.

DESIGN & CONSTRUCTION FEATURES:

- 100% oil free air delivery.
- Factory engineered, factory guaranteed, superior product.
- Alloy steel hardened and ground timing gears.
- Anti-friction bearings.

Imported Substitute

- Rotary oil sealings.
- Rigid one piece CI casing and side plates.
- · Easy rotor timing setting.
- Alloy steel toughened shafts ground to close tolerances.

MODEL	CAPACITY	PRESSURE	SPEED	MOTOR	DIS. SIZE	ORIENTATION
